Layout of a Kitchen

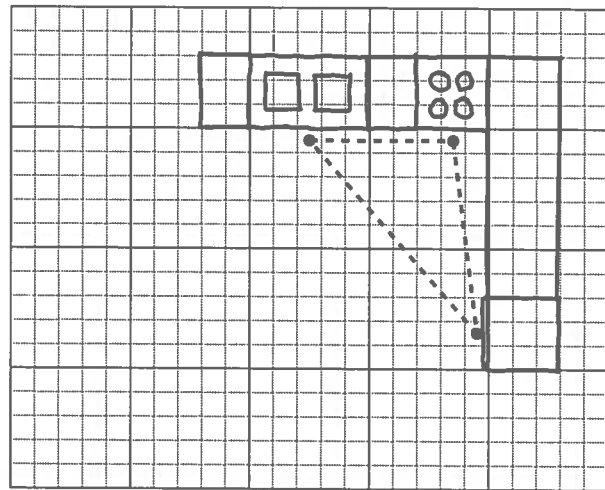

Pages 235 and 236 will be needed to do Lesson 8-1 in the next unit.
 Please complete the pages and return them to class.

Every kitchen needs a stove, a sink, and a refrigerator. Notice how the stove, sink, and refrigerator are arranged in the kitchen below. The triangle shows the work path in the kitchen. Walking from the stove to the sink and to the refrigerator forms an invisible “triangle” on the floor.

Front View of Kitchen

Bird's-Eye View of Kitchen
 (looking down at appliances
 and countertops)

The side of a grid square represents 1 foot.

- Put one coin or other marker on the floor in front of your sink, one in front of your stove, and one in front of your refrigerator.
- Measure the distance between each pair of markers. Use feet and inches, and record your measurements below.

Distance between

- a. stove and refrigerator About _____ feet _____ inches
- b. refrigerator and sink About _____ feet _____ inches
- c. sink and stove About _____ feet _____ inches
